vWeb

Our design & development team have the experience and expertise to build websites that help make businesses more successful. Whether you want to sell your products online, improve sales or just want a presence on the Internet. Veritech will build you an engaging, stylish, professional and easy-to-use website, that is fully responsive for a range of mobile devices. We'll give the tools and training needed to update the content yourself, or for a low monthly investment Veritech will handle this for you.

Content Update Service

Keep your content up to date for as low as $77 per month.

Let our experienced & professional team ensure that your website always stays fresh and up-to-date, while *you use your valuable time in your business.* At Veritech, we also have the programming knowledge to fix & repair website problems.

How does it work? We contact you & verify that your current website content is correct, then we make all the necessary changes to ensure your pages stay constantly fresh. Images, video's, text, promotions and more. Whether you have an existing website or one we've designed initially for you.

Simply by ensuring your website is regularly updated, you'll have higher SEO (search engine optimisation) ratings. High SEO ratings boost your leads by promoting more traffic to your site. We can help make the Internet work better for you. Let us provide you with our valuable knowledge, ensuring your website works for you.

Hosting & Domain

To have an address on the Internet, you need to register a Domain Name. If you already have a domain name, it can be transferred to vWeb. Once your website has been built and domain name registered, it needs to be published on the Internet for all to see. This is provided with our hosting service.

Which includes;

- Web based administration
- Webmail access
- Website statistics
- Spam filter
- Unlimited mailboxes and aliases

Webspace Allowance	Monthly Traffic	Annual Fee Inc GST
500MB	10 GB	$220
3GB	10 GB	$330
10GB	unlimited	$440

Choose your Domain Name from as low as $35!

SecureWeb

Due to the ever-present risk of hacker attacks, website owners must be continually vigilant with the security & setup of their websites. Unfortunately, this is a time intensive task and for most busy business people, is never high on their priority list. Veritech offers a cost effective ongoing service which monitors the key risk areas for website security.

Web-Secure Services Include;

- Keeping CMS (content management systems) and their components up-to-date to the latest stable releases*
- Additional backups kept
- Malware & hacker monitoring
- Google Analytics defined in order to identify activity
- General checking of activity logs
- Configure for SEO-friendly URL's where possible
- Ongoing advisory services for website security improvement

*Does not include any third party components, software or CMS upgrades

$429 inc GST per annum
